I am running to be a member of Cedar Hills City Council. Cedar Hills is a fantastic community with beautiful landscapes and wonderful people. My family moved here in 2018 and I was instantly impressed with the community. We want to continue building a community that we are proud to raise our children in.

I am data driven to find solutions to problems. I am a software engineer, and in my career, I regularly use user analytic data to help prioritize issues. This is the first time I've run for office, and I do not have any close friends in any elected position, so I can bring a new perspective to ideas on how to get the community's voice heard. It is my desire to be a resource to the community.

I believe an elected representative's only focus should be voicing the concerns and opinions of the voters. I look forward to the opportunity to serve this city. Cedar Hills is an amazing community, and I hope to be your voice throughout my service.
