

COMING SUMMER 2022

NEW SHORT COURSE

INITIAL CASE STUDY

The City has been working to tackle how to reduce the number of, or eliminate golf balls being hit over the nets and into the public areas. From the inception of the golf course, the City has raised the nets, replaced the nets, shifted the tee boxes, added targets, and switched to limited flight golf balls, all in an effort to reduce the amount of balls being hit over the net.

A new design idea that included six, par three holes, ranging in length from 60-115 yards was presented to the City Council and residents, who all agreed that this would be a viable solution.

The final project was approved in the summer of 2021.

We are excited for the opportunity that the new course will give to people who want to golf but may not have the desire to do an 18-hole course or for beginners who are looking to get a better feel for the game.
